Translation by Cor ten Hove, with the help of www.elanlanguages.com

5.65 ... In the Final Report § 1.6.3 the DGAC / Investigation Commission state "*However, dispatching the aircraft from Amsterdam with #2 Engine reverse unserviceable, violated the dispositions stated in the AOM (Dispatch Deficiency Guide [DDG]) which made landings in Amsterdam mandatory with 3 operating reverses.*"

The word "landings" is not correct, it must be "departures"; the DDG prescribes that 3 working reversers must be used to start from a repair station (Schiphol).

... Martinair should have asked the Department of Civil Aviation, then the RLD, permission to leave with only 2 reversers, but they did not. ...

Below: from the original Dutch text

5.65 ...In het RvO § 1.6.3 schreef de Commissie van Onderzoek: "*However, dispatching the aircraft from Amsterdam with #2 Engine reverse unserviceable, violated the dispositions stated in the AOM (Dispatch Deficiency Guide) which made landings in Amsterdam mandatory with 3 operating reverses.*" Het woord "landings" is overigens niet juist, dat moet "departures" zijn; de DDG schrijft voor dat met 3 werkende reversers moet worden vertrokken van een repair station (Schiphol).
... Martinair had aan de luchtwaardigheidsautoriteiten, toen nog de RLD, toestemming moeten vragen voor vertrek met slechts 2 reversers, maar dat deden ze niet. ...
