

Safety Culture

Definition

Safety Culture is **the way safety is perceived, valued and prioritised in an organisation. It reflects the real commitment to safety at all levels in the organisation.** It has also been described as "how an organisation behaves when no one is watching".

Safety Culture is not something you get or buy; it is something an organisation acquires as a product of the combined effects of [Organisational Culture](#), Professional Culture and, often, National Culture.

Safety Culture can therefore be positive, negative or neutral. Its essence is in what people believe about the importance of safety, including what they think that their peers, superiors and leaders really believe about safety as a priority.
